processes and employee  
access to personal and  
company information

#### Solution

Abra Suite®  
Abra Employee Self-Service™  
Abra Alerts®

#### Results

Improved HR workflow and  
employee productivity

Headquartered in Butler, Wis., Molded Rubber and Plastics Corporation (MRP) is a custom contract manufacturer of components, extrusions, and assemblies for original equipment manufacturers (OEMs) worldwide. MRP has been a Best Software customer since 1999, when they implemented Abra Suite® to begin the new millennium.

The company selected Abra's Employee Self-Service™, Alerts®, Train®, and Attendance® modules to enhance its day-to-day HR/payroll, benefits, and reporting operations. Its HR department manages the records of 110 employees working for five different divisions. Abra Employee Self-Service has provided the HR staff with a more streamlined, efficient way of managing employee questions regarding insurance, personal information, and even stipulations of the employee handbook, by allowing employees to view their personal records from their desktop.

**"All employees and departments have Self-Service access and enjoy having the freedom to change and verify their personal information," said Marianne Elmer, Accounting System Supervisor at MRP.**

**"We are secure in our decision to implement Abra and are very pleased that our HR system runs so smoothly."**

**best**

To implement and customize its new Abra system, MRP partnered with Illinois-based Solutions Technology & Software Inc. (STS), a leading Abra reseller and implementation and training consultant. "Molded Rubber extensively researched other programs to confirm that Abra would fit perfectly with their existing ERP software," said Rob Denkewalter with STS.
